### 2024 Dry Bean Stock Report Produced Through MDARD's Producer Security Program

Commercial elevators in Michigan held 1,048,369 hundredweight (cwt.) of dry beans in storage as of August 31, 2024, according to the Michigan Department of Agriculture and Rural Development (MDARD). The quantity on hand included 405,135 cwt. of navy beans; 524,574 cwt. of black beans; 53,266 cwt. of small red beans; and 65,394 cwt. of all other classes. Stocks account for all beans in commercial off-farm storage and include a small portion of non-Michigan grown products. This report does not include an estimate of the quantity of dry beans held on farms.

This is the 21<sup>st</sup> issue in a series of Dry Bean Stock reports sent at the request of the Michigan Bean Commission and the Michigan Bean Shippers Association with August 31<sup>st</sup> as the reference date for tabulation and publishing henceforth.

Dry bean stocks are not included in the United States Department of Agriculture's (USDA) Agricultural Statistics Board system of grain stocks reports. Dry bean stocks data included in this report were tabulated from administrative reports supplied monthly by elevator operators to MDARD.
